

## Dog Brained Diaper Pup Hypno Script

This file is intended for adults 18 or older, so if you are a minor, please stop the recording and go elsewhere.

Hello there. Welcome back. You are listening to another erotic hypnosis file by Champ. If you are here with me, then you must want to be hypnotized. That means you are ready to spend some time in trance, listen to my words, and accept all that you hear.

I cannot guarantee that you will go into trance as you listen to this file, but even if you don't immediately go into trance, it's okay to pretend. Sometimes, as you are pretending to go into trance, your subconscious will follow suit and before you know it, you may find you have already entered a state of trance without even realizing it.

The fact that you have chosen to listen to this file means that you are ready to be a dog-brained diaper pup. Needing your diapers. Needing to be controlled and restrained. A dog-brained diaper pup who feels and acts like a good diapered pet.

Before we begin, please make sure you are in a safe place, where you can relax and listen to my words uninterrupted. A reclining position is best, where you cannot roll or fall over. To make this file completely effective, be sure to wear a diaper or something that feels like a diaper whenever you listen to this file. If you have any pup gear that helps you feel more like a dog-brained diaperpup, have it within reach. Once you are situated, turn off any cell phones, lights, or anything else that may distract you as you listen to my words. If you need time to prepare yourself to listen to my words uninterrupted, please pause the tape and do so now. I'll be here when you return. Are you ready to be hypnotized? Good.

And now, I want you to just relax. Yes relax. I want you to close your eyes and imagine yourself in a place where you can be yourself. And where you can see yourself... as a pup. Imagine yourself in this place, it could be any place you choose, and imagine yourself as a pup... in diapers. Yes, see yourself as you are in the puppy mindset. See how you look, feel how you feel, smell how you smell... when you are just a puppy. A puppy in diapers. You can bark, growl or wag your tail, cuddle, nuzzle, lick and sniff. Whatever you do as a pup is what you see. And it's so nice. Just so nice to be a pup in diapers. A diaper pup. And so nice to let your human brain go to sleep, and let your puppy mind come out and play.

I'd like to give you a little trigger now. You can accept this trigger if you like it. And allow it to work whenever it is safe for you do to so, and whenever a person you trust uses the trigger. **Whenever someone you trust says it's time for your puppy brain to come out and play, you can allow your human brain to drop into trance just like you are doing today. Whenever someone you trust says it's time for your puppy brain to come out and play, you can allow your human brain to drop into trance right away. And you can allow your puppy brain to awaken and take over control.** Because you know that it is time for your puppy brain to come out and play. And you know that it is safe for your puppy brain to come out and play. **Whenever someone you trust says the words it's time for your puppy brain to come out and play, you can allow your human brain to go to sleep and your puppy brain to take control** for an hour, a day, or however long you are meant to do so. And **when someone says it's time for your puppy brain to go to sleep, you can drop back into trance and allow your human brain to take over once more.**

Let's try it now. **It's time for you puppy brain to come out and play.** Drop into trance. Nice deep trance. . **It's time for you puppy brain to come out and play** let your puppy brain

start to take control. Still in trance and ready to be a puppy. . **It's time for you puppy brain to come out and play.** Feeling so good. As a happy horny diaperpup.

**Listen to my voice.** Feel that puppyish mindset settling over you.

**Allow your mind to get fuzzy** as you listen to my words. **Allow your mind to get fuzzy,** as you relax and listen to my voice. **Allow your mind to get fuzzy and warm** as you **go into trance.** Allow your thoughts to go fuzzy as you **go into trance.** Such a good puppy as you go into trance. Such a happy puppy as you **go into trance.**

**You are a dog-brained diaperpup.** That's right. You are just a **dog brained diaper pup,** it's that simple. You're a **dog brained diaperpup** with a simple happy doggy brain, and you want it to replace/reinforce your normal mindset.

Listen to my voice. **Feel that puppyish feeling** settle over you. **That puppyish feeling** spreading out over your whole body. **That wonderful puppy feeling** making everything it touches more doglike. Hour head. Your ears. Your eyes, and your nose. And down from there.

**All your human thoughts go to sleep** as that puppyish feeling surrounds you. **All your human thoughts go to sleep** as that puppyish feeling takes over. **All your human thoughts go to sleep,** and it feels good to let them go, so easy to let them go as you go into a nice deep trance.

**Your doggy brain takes over** replacing any words with simple images and desires. **Your doggy brain takes over,** replacing any thoughts about the past or the future with the experience of right now. **Your doggy brain takes over** as you become a happy waggy puppy for your master. You can let all your human words go away.

**You don't have to talk** when you have a doggy brain. You can **make doggy noises** instead. **You don't have to talk;** you can just let yourself **bark like a dog.** **You don't have to talk** because doggies don't need to talk. **Doggies can just make doggy noises and bark** when they need to say something.

**Doggies don't have room** for human speech **in their doggy brains.** Doggies are too busy thinking about food. **Doggies don't have room** for human thoughts **in their doggy brains.** Doggies are too busy thinking about sex, or food, or treats or master. **Doggies don't have room** for speech **in their doggy brains.** Doggies are too busy being good doggies for master.

And **you are a good doggy,** aren't you? **You're a good doggy** who loves to let their doggy brain take control. **You're a good doggy** who loves to **fuzz out,** letting all your thoughts **fuzz out,** until you are completely in the moment. Completely in your senses. Just **fuzz out,** experiencing all your senses, all your desires, and whatever the people around you are doing. Whatever the pets around you are doing here and now. As that wonderful puppy feeling takes over.

**Your doggy nose becomes more sensitive** as your dog-brain takes over. **Your doggy nose** fixates on its favorite smells. **Your doggy nose** lets you smell all the smells in the room. Exciting smells. Delicious smells. Horny smells. **Your doggy nose** can smell them all.

**The smell of food is so intoxicating.** The smell of others is so intoxicating. The smell of yourself is so intoxicating. You want to bury your nose in anything that smells good.

**The smell of your master's musk is so irresistible.** **The smell of a musky crotch is so irresistible.** **The smell of a musky ass, is so irresistible.** **The musky horny smells that you**

**love make you so horny** that you can barely contain yourself. **The musky horny smells you love make you so horny** that you can barely keep from humping. It's easy to get very horny whenever you smell horny scents coming from others, or even yourself. You just want to bury your puppy nose in that scent and take a deep whiff.

**You can't control how horny you are** when you smell someone's crotch. **You can't control how horny you are** when you smell someone's ass. **You can't control how horny you are** when you smell someone's arousal, even your own. When you smell these smells, or any other smells that your doggy nose enjoys, you can become **so aroused**, that you absolutely have to have more of those wonderful smells that you know so well. **So aroused**, that you just want to bury your puppy nose in the scent and take a nice deep whiff. Then another. And another. I'll bet you can imagine that scent right now. You might even smell it in the air. That smell making you feel so horny, **So aroused**, that you are too busy being horny to think about being on your best behavior.

**You can't control how horny you are**, and that's okay. **Pups like you need to be restrained and controlled** so you can be a good puppy. **Pups like you need to be restrained and controlled** because you have an impulsive and distractible puppy brain. **Pups like you love being restrained and controlled** because it helps you to be good. You are always so horny when you are restrained and controlled.

**Feeling restrained and controlled makes you horny. Feeling restrained and controlled** makes you feel good. **Feeling restrained and controlled** reminds you what a horny pup you are. **Feeling restrained and controlled** reminds that you need to be restrained and controlled. **Being restrained and controlled** feels so good, because you know that you belong in any restraints you are put in.

And **you can allow yourself to feel restrained and controlled right now. You can allow yourself to feel restrained and controlled** and know that when you are restrained and controlled, you are being good. Feel that now. That feeling of being restrained and controlled in the way that is most comfortable for you. Being restrained and controlled in the way that is most arousing to you. You can test those restraints. See how sturdy they are. Know that they are strong enough to keep you from wiggling away and causing trouble. Knowing that while you are restrained and controlled you can be a good pup because **you can't control how horny you are**. And you can feel those restraints release now, or keep them on for a little longer, it's up to you. But when you want them to release, they will release, unless there is someone else to decide when to release your restraints. And if there is someone else looking after you, someone that you trust, then they can decide when to restrain and release you, because **you just can't control how horny you are**.

**The diaper keeps your puppy cock contained** because you can't control how horny you are. **The diaper keeps your puppy cock contained** because you can't control your pee. **The diaper keeps your puppy cock contained** so you don't stain the furniture. **The diaper keeps your puppy cock contained** so you don't put that puppy cock inside any toys or puppies or people without permission. **The diaper keeps your puppy cock contained** so you can be a good pup.

**It's natural to for pups like you to be in a diaper. It's natural for pups like you to be in a diaper** because you can't control how horny you are, and **it's natural for pups like you to be in a diaper** because you're not housebroken. That's right. You're not housebroken so it makes perfect sense that you belong in a diaper.

After all, **You can't control your pee.** That's right, **You can't control your pee** and sometimes you pee without meaning to. It just happens. **You can't control your pee when you relax,** such as when you get pets or cuddles or just curl up on the floor. **You can't control your pee when you're excited,** such as when you get a treat or meet a new person, or when master comes home home. **You can't control your pee when you're scared,** when you get in trouble or when you are startled by a loud noise. **You can't control your pee** because you're just not housebroken.

But **the diaper is there to keep you from peeing all over** the house. **The diaper is there to keep you from peeing all over** the furniture. Maybe when you are housebroken you can use the piddle pad, or pee outside, but for now, you are in a diaper, and **the diaper is there to keep you from peeing all over** or humping and leaving stains.

**You are a good puppy. You are such a good puppy. Good pups wear** their diapers all the time. **Good pups obey** their masters or handlers. **Good pups love** that wonderful fuzzy feeling they get whenever they allow their human brains to sleep and their doggy brains to take over. And **you are a good pup,** aren't you?

**And you can listen to this file again and again.** as you become better and better at letting your puppy brain take over. **You can listen to my voice again and again** to achieve the results you desire. And every time you listen to my voice, you can experience the effects of this file a little bit longer. Longer and longer every time you listen to my voice. And **you can keep listening to my voice,** keep listening to this file until it becomes so very easy to be a good pup and let your doggy brain take over whenever it's appropriate to do so.

And now, **it's time for your puppy brain to go to sleep.** Yes, **it's time for your puppy brain to go to sleep** so you can go about your day or evening. And you can be proud knowing that you listened so well and made so much progress today just by choosing to listen to my words. And if you want to listen again, that's okay. You can listen as many times as you like. And you can return again as many times as you want until the changes you seek are complete and permanent.

On the count of five, you will awaken from your nice relaxing trance feeling alert and refreshed. One ...beginning to regain your normal awareness...Two... becoming more aware of your body, lying in a relaxed position... Three... becoming more aware of your breathing, and where you are... four... feeling so, so good as you finally come back on... 5. All the way back, refreshed, and alert remembering all the progress you made here today. I hope you enjoyed your time with me, and I hope you return to listen again soon. Goodbye now.

## **Dogbrained Diaper Pup Mantras**

- Listen to my voice
